Sustainability approach

distantiability approach	
Principal Adverse Impacts	✓ Greenhouse Gas Emissions
	✓ Water
	✓ Waste
	✓ Biodiversity
	✓ Energy Efficiency and Fossil Fuels
	✓ Social and Employee Matters
	The Fund takes into account the principal adverse impacts on sustainability factors (PAIs) through binding elements of its investment strategy. More specifically, PAIs are taken into account through activity-based exclusions based corporate revenues, norms-based exclusions and the
	Berenberg Net Impact Model to select investments.
Further remarks on the consideration of SDGs	
Rationale behind classification according to SFDR	Article 9
Engagement	Yes, organized internally
	☑ Link to engagement policy
Voting	Both internally and externally
	☑ Link to voting policy
Best-in/of-Class	No
ESG-Integration	Yes
Norm-based screening	✓ UN Global Compact
	✓ ILO core labour standards
	✓ OECD Guidelines for Multinational Enterprises
	Other
	MSCI ESG Controversy Red Flags
Themes	✓ Climate change
	✓ Agriculture and forestry
	✓ Social projects
	✓ Renewable Energies
	✓ Biodiversity
	✓ Water
	✓ SDGs
	✓ Education
	All portfolio positions of the fund generate added value for the environment and society through their products or services. Specifically, we focus
	on the positive contribution to solving four global challenges, which in turn include some of the topics of the Sustainable Development Goals.
	These global challenges also represent the investment themes of the fund: (i) Demography & Health, through medical care, health and sustainable
	nutrition. (ii) Climate Change, by sustainable solutions for reducing carbon emissions; (iii) Responsible Use of Resources, through efficient technologies and services; and (iv) Sustainable Growth & Innovation, through infrastructure, fair working conditions and financial inclusion.
Impact Investing	✓ Environmental
	✓ Social
	✓ Governance
	In the Berenberg Sustainable Multi Asset Dynamic we complement the established integration of ESG factors with the inclusion of companies and issuers that help to solve global challenges with their products and services. The fund invests in holdings whose business models or dedicated
	projects create a positive and measurable added value for the environment and society and which is based on structural growth trends and
	sustainable profitability, both in terms of its nature and longevity. A selection of investable Sustainable Development Goals (SDGs) serves as the starting point for the definition of our four global challenges, which also represent the investment themes of the fund. These are Demography &
	Health, Climate Change, Responsible Use of Resources and Sustainable Growth & Innovation. All of the funds' portfolio holdings are thoroughly
	assessed in a proprietary impact measurement model ("Net Impact Model") for their positive as well as potentially negative contribution to solving
	one or more of these four challenges. Additionally, we map portfolio holdings to the Sustainable Development Goals based on their contribution.

Research and Transparency

In-house sustainability analysis	Yes
Research partners	Yes
	MSCI ESG, RepRisk, IVOX Glass Lewis
Percentage of portfolio with sustainability analysis	100 %
Strategically important suppliers included	Yes
Sustainability advisory committee	Advisory
	Berenberg WAM ESG Committee
Analysis of portfolio CO2	Yes, backward-looking indicator
	Among other things, we measure the Weighted Average Carbon Intensity, which indicates the exposure of the portfolio to CO2-intensive activities and thus gives a measure of CO2/climate risk.
Sustainability reporting	Yes
	Sustainability reporting takes place in monthly updated factsheets and in an annually updated impact report. Upon request, we provide interested and invested clients with further information.
At least monthly portfolio publication	No
Certification/Label awarded by independent auditors	✓ FNG Label ★★★

Environmental

EXCLUSION OF SECTORS / AREAS OF BUSINESS - COMPANIES

Fossil fuels (Coal, Oil and Gas)	Yes
	5 % Turnover threshold
Nuclear power (operation and components)	Yes
	5 % Turnover threshold
Green genetic engineering	No
