	Social and Employee Matters
Further remarks on the consideration of SDGs	
Rationale behind classification according to SFDR	Article 8
	The financial product promotes environmental and social characteristics by assessing underlying investments against Environmental, Social, and Governance (ESG) criteria using the methodology of the index provider. As such, the product is exposed to issuers that demonstrate superior or improve environmental and social practices, while implementing robust corporate governance practices within their sector of activity.
Engagement	Yes, organized internally
	C <sup>2</sup> Link to engagement policy
Voting	Yes, organized internally
	☑ <u>Link to voting policy</u>
Best-in/of-Class	Best-In-Class
	Bloomberg MSCI Sustainability Indexes positively screen issuers from existing Bloomberg parent indexes based on MSCI ESG Ratings, which are a "best in class" assessment of how well an issuer manages ESG risks relative to its industry peer group. ESG Ratings are available for corporate, sovereign, and government-related issuers. The minimum threshold applied to Bloomberg MSCI flagship indexes is an ESG rating of BBB or better.
ESG-Integration	Yes
	The index includes issuers with MSCI ESG Ratings of BBB or higher and negatively screens issuers that are involved in business activities that are restricted because they are inconsistent with certain values-based business involvement criteria, including activities related to controversial military weapons, and those issuers with a "red" MSCI ESG Controversy Score are excluded. From February 2021, the index excludes issuers with any Fossil Fuel ties. From July 29,2022 the index is aligned with the EU Paris Aligned Benchmark requirements.
Norm-based screening	✓ UN Global Compact
	✓ ILO core labour standards
	<b>Other</b> United Nations Guiding Principles on Business and Human Rights (UNGPBHR)
Themes	✓ Climate change
	The product must also be consistent with the objectives of the Paris Aligned Benchmark (PAB) aimed at: - Reducing the index's carbon intensity relative to the initial investment by at least 50% Achieving an annual decarbonisation target of at least 7%. This trajectory allows being in line with the IPCC 1.5°C scenario. It should be noted that this is at the index level and not at the level of each underlying.
